

ATTACHTRACKER

PROBLEMS

When users delete Outlook® messages, they also delete all the mailing information from their attachments.

There is no way to track if, when, or by whom a file was sent or received.

SOLUTION

AttachTracker writes the mailing information and displays information directly in Windows Explorer, without opening Outlook®.

DESCRIPTION

Mailing information associated with a file sent or received, is now available with a simple right click on the file name in Windows Explorer.

Available clients

- Outlook 2000/XP®
- Outlook 2003®

System Requirements

- Windows 2000® workstation
- Windows XP® professional

www.addonmail.com
